PROFILE

Full-Stack Developer with 3+ years building production systems across fintech, SaaS, and e-commerce. Consistently delivers measurable results: 85% API performance improvement, 70% reduction in manual processing time, zero payment errors post-launch. Comfortable owning projects end-to-end from architecture to deployment, with a growing focus on AI integration and workflow automation.

EXPERIENCE

Full-Stack Developer | Independent Consultant

Jan 2021 – Present · Remote

- Integrated Paystack & Flutterwave into e-commerce platforms with zero payment errors post-launch.
- Built real-time dashboards with Shopify API syncing, cutting manual processing time by 70%.
- Automated order/payment SMS notifications via Strapi, reducing support tickets by 40%.
- Set up CI/CD pipelines (GitHub Actions, Docker, Vercel) across 6 projects.

Frontend Developer | Threndin

Apr 2023 – Aug 2024 · Remote

- Led frontend development of analytics dashboards used daily by 12+ operations staff.
- Built shared React/Next.js component library; cut feature scaffolding from 3–4 days to under a day.
- Negotiated API contracts early in feature cycles, reducing integration bugs to near zero.

Frontend & Backend Developer | HNG Internship

Jul 2024 – Nov 2024 · Remote

- Built multiple Next.js modules and UI components across different projects in a 50+ engineer cohort.
- Built backend services across multiple projects using Express, NestJS, and serverless API routes with full test coverage.
- Delivered across both frontend and backend tracks, ramping up on new codebases quickly under release pressure.

Backend Developer | Finchat

Jan 2021 – Aug 2022 · Remote

- Built fintech transaction backend on Node.js microservices with Redis caching and optimised PostgreSQL.
- Added real-time balance & transaction updates via WebSockets, eliminating client-side polling.
- Maintained near-zero bug rate across payment flows with comprehensive unit and integration tests.
